rapidLIVE

Fast, efficient and cost-effective deployment of Oracle Argus

Delivering a fully pre-configured Oracle Argus environment, rapidLIVE is a simplified and cost-effective route to deploying one of the industry's leading global safety databases.

Hosted today for pharmaceutical companies and CROs of all sizes, rapidLIVE is optimized for safety teams, with pre-built automations including workflows, validations, and expedited reporting rules.

rapidLIVE is available for the latest version of Oracle Argus – critical for your E2B R2/R3 readiness.

Speeds go-live, lowers costs

Simplified processes including pre-built workflows help reduce time and effort and increase ROI. rapidLIVE can empower your team to start work immediately - lowering costs and optimizing time-to-value.

Reduces validation effort

Our system is fully pre-configured following industry best practices to reduce validation effort for your safety team - minimizing the need for lengthy and iterative pilots.

Minimizes downtime

Structured data migration means minimal downtime. Our services span data cleaning, data mapping and data migration - from E2B and E2B+ to custom migration.

The rapidLIVE advantage

-  Successfully deployed in PV projects worldwide.
-  Available for the latest version of Oracle Argus for E2B R2/R3 readiness.
-  Compliant with 21 CFR Part 11 and EU data privacy laws, as well as standards such as ISO 27001 for optimized data security.

Secure hosting

Available as multi-tenant SaaS or a dedicated environment, and compliant with 21 CFR Part 11, EU data privacy laws, and standards such as ISO 27001, rapidLIVE hosting is managed by our dedicated safety and technical experts.

Dedicated user training

Both deployment modes are supported by comprehensive user training - enabling your PV team to get up and running with Argus fast and with minimal fuss.

Expert support

Access administration, system configuration and business consulting support delivered by our expert team. We can also provide validation support for your systems leveraging our functional and technical expertise - with input from our dedicated QA team as needed.

Total flexibility: deploy your way

Software-as-a-service

Our SaaS package offers your own secure, dedicated tenant inside a controlled Oracle Argus environment.

Dedicated environment

Our dedicated test, validation and production environments are available for deployment exclusively for your organization's sole use.
